

WifiMqttClient::setCallback

setup

callback

```
graph LR; A[WifiMqttClient::setCallback] --> C[callback]; B[setup] --> C;
```

The diagram illustrates a dependency or assignment relationship. Two white rectangular boxes, one labeled 'WifiMqttClient::setCallback' and one labeled 'setup', have blue arrows pointing to a gray rectangular box labeled 'callback'. The 'WifiMqttClient::setCallback' box is positioned higher and to the left, while the 'setup' box is lower and further to the left. Both arrows converge on the 'callback' box, which is located to the right of the other two boxes.
